DETAILED ACTION

1. Applicant's election submitted 13 August 2009 has been entered. However, upon further consideration of the claims and in light of the preliminary amendment that was inadvertently missed for the original restriction issued 16 July 2009, a new restriction requirement is issued below based on the amended claim set submitted 13 August 2009.

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 96, 97 and 99-122, drawn to a method comprising the special technical feature of immobilizing a target molecule.

Group II, claim(s) 98, drawn to a method comprising the special technical feature of interacting a biological sample with a plurality of transistors.

1. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: groups I and II do not share a corresponding special technical feature over the prior art.

According to 37 CFR 1.475 regarding unity of invention:

(a) An international and a national stage application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept ("requirement of unity of invention"). Where a group of inventions is claimed in an application, the requirement of unity of invention shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or

Application/Control Number: 10/567,233 Page 3

Art Unit: 1641

corresponding special technical features. The expression "special technical features " shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art.

- (b) An international or a national stage application containing claims to different categories of invention will be considered to have unity of invention if the claims are drawn only to one of the following combinations of categories:
- (1) A product and a process specially adapted for the manufacture of said product; or
- (2) A product and a process of use of said product; or
- (3) A product, a process specially adapted for the manufacture of the said product, and a use of the said product; or
- (4) A process and an apparatus or means specifically designed for carrying out the said process; or
- (5) A product, a process specially adapted for the manufacture of the said product, and an apparatus or means specifically designed for carrying out the said process.

Unity of invention exists only when there is a technical relationship among the claimed inventions involving one or more special technical features. The term "special technical features" is defined as meaning those technical features that define a contribution with each of the inventions considered as a whole, makes over the prior art. The determination is made based on the contents of the claims as interpreted in light of the description and drawings.

Applicants are allowed at most one product, one method of making and one method of using in a single general inventive concept. However, the methods of using of groups I and II do not form a general inventive concept because they do not share a corresponding special technical feature over the prior art. None of the features of the method of group I and group II overlap, therefore the methods of using do not share a corresponding special technical feature over the prior art.

Election of Species

Application/Control Number: 10/567,233 Page 4

Art Unit: 1641

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

3. If group I is elected above, a *single* species from *each* of the following species groups A-E listed below, must also be elected.

The species are as follows:

- **Group A** is drawn to the type of binding of the biomolecule to the target, a single type of binding must be selected from: directly and indirectly. (claims 100 and 101)
- **Group B** is drawn to the type of binding of the affinity binding molecule to the detection surface, a single type of binding must be selected from: directly and indirectly. (claims 103 and 104)
- **Group C** is drawn to a type of affinity binding molecule, a single type of binding molecule must be selected from: RNA aptamer, protein, antibody, metalloporphyrin, polyelectrolyte material and nucleic acid. (claims 106-108)
- **Group D** is drawn to a type of spacer molecule, a single type of spacer molecule must be selected from: small organic molecule and organic polymer. (claims 110 and 111)
- **Group E** is drawn to a signal molecule, a single type of signal molecule must be selected from: RNA transcript, tag peptide, biotinylated antigen and RNA aptamer. (claims 112-116)

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Art Unit: 1641

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: claim 96.

4. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the species in each of the groups cannot coexist and do not share a corresponding special technical feature.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MELANIE YU whose telephone number is (571)272-2933. The examiner can normally be reached on M-F 8:30-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Shibuya can be reached on (571) 272-0806. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
